

PATHWAY TO **HOMEOWNERSHIP**

At Home Keys Landscaping we believe that financial independence starts with financial literacy, and understanding personal finance is the key to unlocking long-term financial freedom. Our program covers essential topics such as budgeting, saving, investing, and managing debt. By helping landscapers become more financially literate, we aim to set them up for success in both their professional and personal lives. Additionally, our goal is to guide our team through the homebuying process, from improving credit scores to securing financing, so that every employee has the opportunity to become a homeowner and take control of their financial future.

Beyond supporting our employees, Home Keys Landscaping is committed to empowering the larger landscaping community. We are focused on teaching landscape business owners how to build wealth by actively flipping homes in their local markets and / or by passively investing in real estate syndication deals across the country. By providing business owners with the knowledge and tools to diversify their income streams, we help them create financial stability and build generational wealth.
